

## SunSystems – Vision 6 New Features

A solution to provide online reporting on demand – when you need it!

### Better Selection

- ✦ Segment filter is allowed in filter criteria (e.g. selection on ABCXX123 in T-code)
- ✦ Non-contiguous selection in the filter criteria (e.g. selection on account code)
- ✦ Cross database (consolidation) in the database filter - Business Hierarchy (e.g. DEM + DM1)
- ✦ Tree hierarchy structure for pre-defined report structure
- ✦ Report data item can be on specified node of the Tree hierarchy structure

### Better Reporting

- ✦ Vision can now linked with others database (not only SunSystems) through Vision Serducts
- ✦ Dynamic reports on difference systems (not only SunSystems) can be achieved
- ✦ Cube Analysis (OLAP-like analysis) is introduced
- ✦ Chart can be dynamically created for the corresponding cube selection

### Better Management

- ✦ Integrated security feature enables one time logon between Vision and Windows users
- ✦ Many-to-One user mapping with SUN (e.g. one SUN user can link with many Vision users)
- ✦ All report settings can be stored in the Query template repository in the server

### Maximize License Usage

- ✦ Concurrent user license is introduced in Vision 6
- ✦ Vision 6 includes Vision XL, Vision Executive, Vision Word and Vision Executive Browser

### Vision Executive Browser

- ✦ Remote user can access the Vision Executive through Browser (e.g. Internet Explorer)
- ✦ No Vision software is needed at the client side
- ✦ All Vision Executive functions (e.g. Breakout, Drill Down, Expand...) are retained in the browser

Please contact Sandra Ng at 3150-9220 or email to [info@oasis.com.hk](mailto:info@oasis.com.hk) for further information

## Vision Executive

- ❖ Query prompt is introduced to allow user-defined variable (e.g. T-code) at report run time
- ❖ Link code allows reports to be made between two different tables (e.g. LA, SO, PO, others)
- ❖ Fixed/Delay Extraction to increase the performance in Primary Worksheet
- ❖ Locked and Extract Locked Value for higher flexibility of the extract performance
- ❖ "Document" template is introduced for custom report and output
- ❖ User can make individual archive on previous data extraction
- ❖ Recalculation Order (10 levels) can be set for formula calculation

## Vision XL

- ❖ Build Profile can be made on Filtered Column for future modification
- ❖ User can use Wizard to make a batch of Filtered Column
- ❖ Combined and Simplified Data Send (Journal Import) template is introduced
- ❖ Preview function in Data Send (Journal Import) enables better data checking before export
- ❖ Skip blank rows can be optionally set in Data Send (Journal Import)
- ❖ Recalculation Percentage for the worksheet is displayed at the left bottom corner
- ❖ User can output the report to PDF in MS Excel
- ❖ Comment Viewer enables user to view and print comment cell
- ❖ XL formulas can be copied through the Formula Export/Import function
- ❖ User can use Formula Fill to fill the formulas in a range of table cells
